

Technical Data Sheet

GOMMA SOLVENTE 940 CTP

Emulsion for washing and gumming of offset printing plates

GOMMA SOLVENTE 940 CTP is suitable for fat inks solubilization and, contemporarily, for gumming. Particularly effective for plates storage and for short machine standstill.
GOMMA SOLVENTE 940 CTP can also be used as plates cleaner, improving, in start-up, ink trapping

Working instructions

- Shake well before use.
- Apply GOMMA SOLVENTE 940 CTP directly on the plate surface using a wet sponge and clean, being careful that there is no more trace of ink.
- Spread eventually other product with dry cloth, up to get a thin and uniform protection layer.
- Let it dry

Precautions

It is recommended to wash well with water when stored plates are replaced in the machine. If necessary, reactivate with a cleaner, like ACTIVAL IMAF.

Main characteristics

- Suitable to all kinds of offset plates
- It improves the ink trapping in printing areas
- Quick start up after machine standstill
- With one only operation, it washes and gums the plate
- Possibility for short and long-term storage

Physical properties

Appearance	Viscous solution
Density	0,970 Kg/lit
pH at 25°C	6,30
Flash point	57°C
VOC - Volatiles Organic compounds	35%

Safety

Read Safety Specifications before using this product

Packing

Carton containing 6 cans x 2 lt each

Storage

- Store at room temperature, in dry and well-aired place
- Keep far from heat and direct sunlight.
- Keep closed the containers.
- Storage time : 12 months from production date
