

# PLATE MATIC UV

Product for plates cleaning from UV inks, for filing

## Working instructions

- Ready-to-use product.
- Shake always well the can before pouring product in the machine.
- Viscosity increases during use, due to dissolved ink. Therefore, it is necessary to add water to restore previous viscosity.

## Main characteristics

- Low volatility solution
- Soft smell and excellent cleaning power.
- It allows to eliminate fat residues, both ink and paper ones.
- Use it only with baked plates
- Use it only with NBR rubber rollers.
- Particularly suitable to UV inks

## Safety

Read Safety Data Sheet before using product.

## Packing and storage

10 litres

12 months from production date

## Properties

Chemical characteristics	Appearance	White solution
	Density	0,920 gr/ml
	Flash point	> 61°C
	Boiling point	>200°C
	Hydromiscible	yes
