

IMAQUA 78 A NRL

Universal fountain solution for sheet fed presses

WATER VALUES TO BE USED : hardness : 6-14°dH (11-25° fH French degrees)
Conductivity : 300-550 μS/cm

Working instructions

• Recommended dose: 2÷4%

• Recommended alcohol dose: 6÷10%

 Prepare, out of the machine, the reference blend, record the pH and conductivity values and then proceed to prepare the working solution in the machine. Afterwards, check that values are kept as the sampled reference.

Reference values at 3% concentration:

 $pH = 3.48 \div 3.58$

conductivity = $2340 \div 2540 \,\mu\text{S/cm}$

Important

 We recommend the careful cleaning of dosage and circulation systems before using the just mixed solution.

Main characteristics

- Suitable to wetting systems with IPA
- Effective for <u>soft and medium hardness</u> water
- Alcohol concentration 6÷10%

Physical properties (concentr.solution)

Appearance	blue solution
Density	1,00 Kg/lt
рН 25°C	2,35
Conductivity (25°C)	28.600 μS/cm

Safety

Read the safety specifications before using this product.

Packing

10 litres cans

Storage

- Store at room temperature, in dry and well aired place
- Keep far from heat and direct sunlight.
- Keep closed the container.
- Storage time: 12 months from production date
