

AQUAMATIC

Additive for water of automatic blankets washers

Working instructions

Concentrated additive to be added from 3% up to 10% in tap water tray of automatic blankets washer systems .

Main characteristics

- Product lowers water surface tension, favouring its emulsion action with solvent ; this makes easier blankets cleaning.
- Furthermore, it prevents formation of calcareous encrustations and it avoids algae formations.

Safety

Read the Safety Specifications before using this product.

Packing and storage

10 litres

12 months from the production date

Properties

Chemical characteristics	Appearance	liquid
	Density	1.018 gr/ml
	Water-miscible	yes
