

# VIX SOL

## Product for inking rollers - special mixture for colour change

### Instructions for manual use

- Wash milling rollers with cleaning solvent
- Let inking rollers perfectly dry .
- Pour product on rollers running at minimal speed and let it act for about 3-5 minuti.
- Clean again with a traditional solvent for daily cleaning.
- Shake always well the can before use.

### Main characteristics

- Very active product, expressly developed to thoroughly eliminate inks residues both from blankets and inking rollers
- It penetrates rubber pores, dissolves dried and vitrified inks without damaging the molecular structure of fabrics, rollers and blankets
- It restores previous elasticity and consistency
- Absolutely necessary when changing colours.
- It damages coating of not baked analogue and thermal plates.

### Safety

Read the Safety Specifications before using product

### Packing and storage

1 liter can

12 months after production date

### Properties

Chemical characteristics	Appearance	Amber coloured liquid
	Flash Point	100°C
	pH (25°C)	7
	Water mixable	yes
