

FOUNTAIN 2000

Universal fountain solution for sheet fed presses

**WATER VALUES TO BE USED : hardness : 6-14°dH (11-25° fH French degrees)
Conductivity : 300-550 µS/cm**

Working instructions

- Recommended dose : 2÷4%
- Recommended alcohol dose : 5÷10%
- Prepare, out of the machine, the reference blend, record the pH and conductivity values and then proceed to prepare the working solution in the machine. Afterwards, check that values are kept as the sampled reference.
Reference values at 3% concentration: pH= 4,88÷ 4,98
Conductivity = 2020÷2220 µS/cm

Important

- We recommend the careful cleaning of dosage and circulation systems before using the just mixed solution.

Main characteristics

- Additive containing gum
- Alcohol concentration 5÷10%
- Recommended from small up to size 70x100 with traditional (with damper cover) or modified wetting.
- Effective for soft and medium hardness water
- It allows quick and clean start up

Physical properties (concentr.solution)

Appearance	blue solution
Density	1,080 Kg/lit
pH 25°C	4,20
Conductivity (25°C)	22.300 µS/cm

Safety

Read the safety specifications before using this product.

Packing

10 and 20 litres cans
200 litres drums

Storage

- Store at room temperature, in dry and well aired place
- Keep far from heat and direct sunlight.
- Keep closed the container.
- Storage time : 12 months from production date

The information given in this sheet is to be considered reliable and is provided in good faith but without guarantee.
Specifications subject to change without notice.
