

PLATE MATIC 60

Plates cleaning product for filing

Working instructions :

- Ready-to-use product.
- Shake always well the can before pouring the product in the machine.
- Viscosity increases during use, due to dissolved ink. Therefore, it is necessary to add water to restore previous viscosity.

ATTENTION:

- We recommend to clean plates within 3 hours for better results.

Main characteristics:

- Low volatility and low viscosity emulsion.
- Excellent cleaning power.
- It allows to eliminate both fat ink residues and the paper ones.
- Product suitable to wash off traditional inks, using plates washing machines
- Use it only with NBR rubber rollers.

Safety:

Read Safety Data Sheet before using product.

Packing and storage :

20 litres

12 months from production date

Properties:

Chemical characteristics	Appearance	White emulsion
	pH 25°C	2.00
	Flash point	> 61°C
	Boiling point	>200°C
	Hydromiscible	yes
